

## HOW ENGLISH WOMEN WAGE THEIR WAR

Demand the Privilege of Voting and Persecute Asquith For His Reluctance.

## PERRY BELMONT'S SPEND EASILY GOTTEN MILLIONS

Weighing a Man's Signature Is Now All the Rage in London.

By William True Hawthorne.

Special Correspondence.

London, Aug. 15.—The mob spirit that has characterized the extraordinary campaign waged against Mr. Asquith and other members of the ministry not in sympathy with the radical wing of the woman suffragists, is being roused in the provinces by agitators from London. Pursuing their "arch enemy" Mr. Asquith, into his own constituency, Miss Parkhurst and her following are drawing a cordon about his home in east Devon that bores the nature of both the boycott and the siege.

Rarely has a high government official been subjected to such a "ragging" as was witnessed in London during the recent session of parliament, and which culminated in his being chased through the streets and pelted with missiles by a mob of women, under the lead of Miss Parkhurst and her precious lieutenants. This was followed by besieging the chancellor's residence day and night for a period, the air at all hours being filled with feminine cries of deprecation and vituperation.

Already the tactics pursued in East Devon have resulted in the women householders of Lymington demanding an interview with Mr. Asquith on the suffrage question, and Miss Parkhurst will be there to see that the chancellor of the exchequer does not escape. An organizer-in-chief, Miss Parkhurst came back to London the other day and called a mass meeting in Hyde Park to collect funds wherewith to keep her army in the field until parliament convenes shortly, when the scene of last session will be re-enacted here.

Mr. Asquith invited attack from the suffragists for the reason that he is, next to Campbell-Bannerman, the spokesman of the Liberal party. As a master of felicitous phraseology and forcible speech he is easily first in the house of commons. His clear-cut sentences, every word in the right place, every statement clad in most appropriate language, make him a prime favorite with the reporters who endure so much from the halting fashion of the average parliamentary orator. Mr. Asquith further established himself in the good opinion of the reporters by boldly discarding a venerable tradition in his budget speech. He made no jokes about cocoa, tea or rum. A "comic relief" of some previous chancellors made the press gallery groan and squirm.

**Belmonts Shine in Paris.**  
Echoes are reaching London society and shops of the purchases made by the Perry Belmonts in Paris. Many American millionaires and their wives have succumbed to the fascinating wares displayed by the jewelers, dress makers, and merchants of the Rue de la Paix this season, but it appears from the gossip going around that the Belmonts easily eclipsed all the others. As Mrs. Belmont already possesses jewels worth a king's ransom, their fancy took them elsewhere for articles of personal adornment and domestic outfitting. Among the trophies of their shopping tours were several valuable Beauvais tapestries, a rare collection of old Sevres china, and bronzes and some beautiful sculpture for their Fifth Avenue mansion. Furthermore, the Belmonts outstripped other Americans in dispensing hospitality in Paris and the dinner given by them at the Ritz was one of the most notable of the season. All this is accepted as becoming to the representative of the Rothschilds in America, even though it does not comport with the economical impulses of some of the members of the great family itself.

**Cars on Victoria Embankment.**

The victoria embankment, the widest thoroughfare in Central London, presents a torn-up appearance that makes it look as if it had been included in the reconstruction process through which Piccadilly and the Strand are passing. The piles of debris are, however, only incident to the construction of electric car lines along the roadway and across Westminster bridge. The work of laying the tracks is being carried on rapidly, and before Christmas the gongs will be ringing for carriages and cabs and motor cars to clear the way over which they have had until now undisturbed sway. Though it is impossible to avoid interference with the lower branches of the beautiful shade trees on the river side of the embankment, it is not thought that the ax of the woodman will be permitted to do much havoc. In any case, it was only on the understanding that the tramway was to be laid on one side of the road that parliament gave permission for its construction, so that the responsibility lies not at Spring-gardens, but at Westminster.

**Get Your Signature Weighed.**

London has a new distinction to be

Does your face

look fresh,

or does it look

low, faded and worn? If your complexion isn't smooth and transparent as you would like it to be, use HAGAN'S MAGNOLIA BALM. No woman need look old and worn who will use this delicate, full liquid beautifier. Harmless, instantly applied and impossible to detect.

proud of in the fact that it is the only place where one can have his signature weighed. At the opening of the new city weights and measures office, during a testing of the delicate instruments, several of the visitors ascertained the exact avoirdupois of their names. One who adorned his name with a heavy flourish found that he had used three-tenths of a grain of that, another who was more sparing, one-twentieth of a grain. By a nice calculation the scales showed that a penny one. The inspectors upon hundreds of a grain heavier than a whom this testing work falls as necessarily past masters in the art of exaltitude.

**Five Million Dollars an Acre.**  
The extravagance of municipal ownership in the borough of Fulham have around the reform party to vigorous efforts to bring a change and a spirited campaign is on for control of the borough council. The issue will be decided at the coming election, and the ratepayers' Defense Association is engaged in making comparisons of expenditures which present on the face a bad showing for a party in power. The outgo of money has been increasing by leaps and bounds, mostly in payment for what is called the frills of municipal ownership, but the greatest scandal has been the paying of more than three hundred thousand dollars for the setting back of a public house from the street a few feet. The amount paid for the new line of frontage works out at over five million dollars an acre, and the great body of rate payers are groaning accordingly. The council, however, so far from being abashed by the show of disapproval, minded to add still further to its lavishness by providing a system of elaborate vapor baths for the great unwashed.

**A Much Traveled Infant.**  
The Phipps baby, though still on the sunny side of his first year, has just crossed the Atlantic for the fourth time in his tender career. Besides, he has been as far as Pittsburgh several times, as far north as the Highlands of Scotland, and as far south as the Pyrenees. At present he is in London with his parents, Mr. and Mrs. J. S. Phipps, who, being Americans, claim the record for their young hopeful as the most traveled baby. They recently arrived from New York, and on the voyage were much concerned about the health of their son. They have often taken him on automobile journeys, but as his condition still causes some anxiety he is to stay with his grandparents at Battle Abbey during his parents' absence in Scotland. Mr. Phipps is the eldest son of Henry Phipps, the Pittsburgh steel magnate.

**Sanitation of the Oath.**  
The nice question of keeping the Bible in sanitary condition for taking the oath in magistrates' courts has not been settled. It would seem, by providing washable coverings for the gospels. Indeed, it is doubtful whether "kissing the book" is now as safe from the germ theory point of view as it was when leather-bound volumes were used. The Bibles are now bound in polished white covers, on which finger prints and lip prints are left by nearly every witness, and disease-laden prints are therefore more easily transferred to the fingers or lips of the next witness.

**Death of a Former Court Favorite.**  
The dowager Marchioness of Londonderry, a "grand dame" of the olden time, whose death was announced the other day, was a keen politician, and took an active part in several famous elections. The marchioness was the daughter and heiress of Sir John Edwards, a liberal statesman, but she was a staunch Tory. Her sympathies, however, were always with the people. A brilliant conversationalist, she was for many years a favorite at the court of Queen Victoria. She possessed some of the finest diamonds in the world, among them the superb "Antrim" gem, consisting of an all round diamond crown with an attendant necklace and stomacher. Sixty years ago she married the fifth Marquis of Londonderry, who died in 1881.

## DOWNIE'S SUCCESSOR IS NOT ANNOUNCED

J. B. Downie has resigned his position as manager of the Albuquerque Gas, Electric Light and Power Company and departed yesterday for Santa Fe. C. K. Durbin, secretary of the company, has taken charge of the company's affairs here. Mr. Durbin's home is in Denver. Interviewed this morning regarding Mr. Downie's successor, Mr. Durbin stated that the company would not be ready to announce a new incumbent for a month yet.

Mr. Downie came here about a year ago from Pueblo, Colo., and has managed the company's interests here since that time. He has not given out what his future plans are, except that he does not expect to remain in Albuquerque.

**PILES CURED IN 6 TO 14 DAYS.**  
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

**NOTICE TO CONTRACTORS.**

Bids are invited by the undersigned for the boring or drilling of a well in Fairview cemetery, as per specifications, which will be furnished upon application.

O. W. STRONG'S SONS,

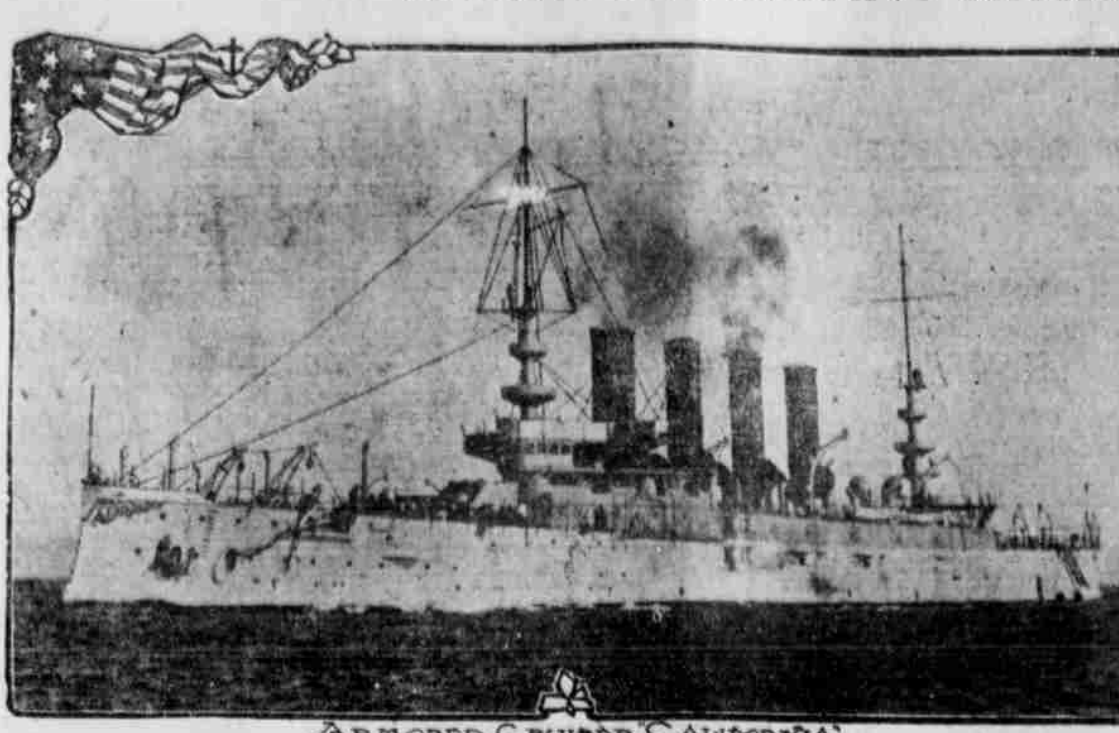

Supts. Fairview Cemetery.

**A Badly Burned Girl**

or boy, man or woman, is quickly out of pain if Bucklen's Arnica Salve is applied promptly. G. J. Welch of Tekonsha, Mich., says: "I use it in my family for cuts, sores and all skin injuries, and find it perfect." Quickest pile cure known. Best healing salve made. 25c at all druggists.

Mrs. Bambini, at her parlor, No. 209 West Railroad avenue, is prepared to give thorough scalp treatment, to hair dressing, treat corns, bunions and ingrowing nails. She gives massage treatment and manicuring. Mrs. Bambini's own preparation of complexion cream builds up the skin and improves the complexion, and is guaranteed not to be injurious. She also prepares a hair tonic that cures and prevents dandruff and hair falling out; restores life to dead hair; removes moles, warts and superfluous hair. Also a face powder, a freckle cure and pimple cure and pile cure. All of these preparations are purely vegetable compounds. Have just added a vibrator machine for treatment of scalp, face and cure of wrinkles. It is also used for rheumatism, pains and massage.

## THE NEW CRUISER "CALIFORNIA" IS A PRETTY FIGHTING MACHINE

ARMORED CRUISER CALIFORNIA

The new 14,000-ton armored cruiser California, just completed at the Union Iron works in San Francisco, is on her way to the Santa Barbara channel, where her builders must demonstrate to the satisfaction of Uncle Sam that the latest addition to the navy is all the specifications call for. She is declared the prettiest fighting craft ever turned out here.

The California belongs to the same class as the Colorado, Pennsylvania, West Virginia, Maryland and South Dakota. The last named cruiser, which is cradled at the Union Iron works, is still unfinished.

The California is built of steel, heavily armored. She has twin screws, four smokestacks and two military

masts. She is 502 feet long, 70 feet in beam and will draw 24 feet 6 inches to 27 feet 6 inches, according to the condition of her bunkers. Her engines must develop 23,000 indicated horsepower, and the power to produce this is provided by 32 Babcock and Wilcox boilers. Her bunker capacity is from 900 to 2,000 tons, according to the service in which she is engaged, and at a 10-knot gait she has a steaming radius of 5,000 miles.

The cruiser's armament, with Yankee gunners at the batteries, should make her an object of intense interest to any enemy with whom she may be called upon to argue. She has four eight-inch guns in pairs, in turrets; fourteen six-inch, eighteen fourteen-

pounders, twelve three-pounders, semi-automatic, four one-pounder quick-fire, four one-pounder automatic, two thirty-caliber Colts, two three-inch field guns and two torpedo tubes, submerged forward.

For each eight-inch gun she will carry 125 rounds of ammunition, 300 rounds for each six-inch, 250 rounds for the fourteen-pounders and 500 rounds each for the others.

Her full complement of officers and men is 825.

The California was authorized by congress March 5, 1899. Her keel was laid May 7, 1902, and she was launched April 23, 1904.

Captain Thos. Stowell Phelps will be the California's first commander.

## NEW YORK IS PLACE OF NO LITTLE NEWS

Gossip and Scandal Seem to Run Riot There With Ease and Freedom.

## YOUNG WOMAN GIVES FOR PRIZE BULL DOG \$5,000

Railroad Magnate's Daughter Finds Time For Works of Charity and Humane Interest.

New York, Oct. 15.—That a scandal will develop from the action of Mrs. Bertha K. Gresham, a Washington society woman, in having him arrested in this city on a serious charge, is the declaration of Dr. Raulo Amador, son of the president of the Panama republic.

Dr. Amador is a practicing physician in this city and also enjoys the distinction of being Panama consul general.

His pretty wife bailed him out of prison soon after his arrest upon highly sensational charges. It is alleged by the doctor that Mrs. Gresham was the author of the anonymous letter which caused Mrs. Elah Dunlop Jordan, now Mrs. J. D. Little, a wealthy widow of Macon, Ga., to break her engagement with Senator Luis Corea, Nicaraguan minister at Washington, last winter. Though Senator Corea disavowed the charge that he had negro blood in his veins, the widow refused to return to him.

Mrs. Gresham is the daughter of Wm. Kennard, for years a page in the senate. Her first husband was Rear Admiral Friabee. Soon after his death she married Lieut. Wm. Gresham, U. S. A.

She was acting as a correspondent, after Lieutenant Gresham's death, with a junket party to Panama, when she met Dr. Amador. He denies her charges. She alleges, among other things, that he lived with her for two years as her husband. She says she contemplates suing him for \$100,000 and that she had him arrested so that he could not leave the country.

Miss L. De Groot, a young society woman, who recently paid \$5,000 for Mahomet, a prize bulldog, declares that she is greatly pleased with her "bargain."

Mahomet has just taken another blue ribbon at the swell Bryn Mawr dog show. This, added to the prizes he wore a his belt, makes him the greatest bulldog in the world.

The dog was recently brought to this country and disposed of to Miss De Groot. He is broad breasted, extremely wide spread of forelegs, has jaws like a stone crusher, and is lustrous around the head and white around the body.

Miss De Groot has taken out \$5,000 life insurance on the animal. Mahomet has the run of her fine apartments at 252 West Twenty-second street. So that he would not be injured, his mistress removed all articles of furniture that had dangerous projecting points.

Miss Mary Harriman, daughter of E. H. Harriman, the Pacific railroad king, who a few weeks ago was reported to have made \$100,000,000 for himself and friends in a stock coup, has been elected president of the Junior league of the teeming East side.

Miss Harriman is a society debutante but she does not find the social whirl too onerous to permit of her donating plain clothes two or three times a week and taking her stand in the settlement house, there to minister to the miseries of New York's poor children.

The Junior league is a wealthy organization. It is the favorite charity of New York's society buds. On Sunday afternoons the daughters of wealth and fashion gather within the dingy portico of the settlement house and labor with the cares and needs of the children of "the other side."

**TOBACCO HARVEST WILL BREAK ALL RECORDS**  
Madison, Wis., Oct. 15.—It is confidently expected that the tobacco harvest in Wisconsin this year will break all previous records. The harvest is well under way and on all sides it is admitted that the stand is of finer quality than ever before. Owing to tobacco growing being more profitable than the dairy industry the clover fields of a year ago are now bearing a heavy crop of tobacco plants. In this state tobacco thrives well, and expert culturists have found that they can produce a better leaf than that of the east, and that by certain shading of the plants it will, in a few years, be superior to the Sumatra product.

**FUEL ORE WILL MEAN MUCH IN SMALL MINES**

Denver, Colo., Oct. 15.—At many mines and smelting plants particularly those which are situated at a distance from a coal supply or where transportation of coal is difficult and expensive the fuel problem, which was one of the most difficult that confronted the operator, is now on a fair way of being solved. As fuel ore can be used with great advantage and can always be at hand, experiments are being tried with it, with such results, that already it is the general opinion that it will be made available for all the mining operations. It is not only well adapted to steam raising and smelting purposes but it is especially effective in assaying furnaces, small smelting furnaces, annealing and hardening furnaces or in fact in any furnace in which quick and easily regulated heat of varying controllable degree is required.

**IRON AND STEEL COMPANY REORGANIZED IN PITTSBURGH**

Pittsburgh, Oct. 15.—The committee appointed for the reorganization of the Susquehanna Iron and Steel company, which was placed in the receivers' hands in December, 1903, have decided to form a new corporation to be called the Susquehanna Iron Products company to have a \$2,000,000 common stock capital, \$750,000 7 per cent cumulative preferred stock. The preferred stock will be offered for subscription at par with one share of the common stock given as a bonus with each two shares of preferred. There will be retained in the treasury \$125,000 common stock, and the remaining \$1,500,000 is to be exchanged for share for the capital stock of the old company.

**TEXAS STATE FAIR IS BIG AFFAIR THIS YEAR**

Dallas, Texas, Oct. 15.—In the state fair grounds Saturday the Texas state fair took place, and both from point of attendance and number and quality of exhibits by far surpassed anything of its kind held in the state before. In all departments entries showed an increase over the previous year, while the quality was far above any previous standard. Since last fair a great many important changes have been made in the fair grounds. Everything passed off to the entire satisfaction of the directors and all concerned.

**PRESBYTERIANISM GROWS APACED IN NEW YORK**

New York, Oct. 15.—With the completion of three churches, which are to be dedicated in two or three weeks, the Presbyterians of New York will have spent, in one year, \$2,500,000 on new church buildings and their sites a record which has never been passed in the history of the Presbyterian church or by any other denomination. Sites have been purchased and buildings erected for seven different congregations from Madison Square to West Farms. Contributing most to the cost is the Madison Square church.—Dr. Parkhurst.

**NEVADA HAS BIG MINING BOOM NOW STRICTLY ON VIRGINIA CITY, NEVADA, OCT. 15.**

Probably never before in the history of this new mining state has there been so much booming and excitement. New mines are daily opening up. The Greenwater Red Bay Copper company, which offered 250,000 treasury shares, had about over-subscribed by the amount of 600,000 shares, and in several other cases shares have

been oversubscribed largely. Three new claims in the district have been incorporated as the Goldfield Silver Peak Mining company and have been prospected sufficiently to disclose a well defined ledge in a formation of granite, chert and porphyry. Values have been found as high as from \$40 to \$300 a ton. The shaft on the lead vein is down 150 feet the ledge maintaining its width of two feet. The ore assays 74 per cent lead—about same as above—but the silver values have increased to 20 ounces to the ton. On another new claim a shaft down fifteen feet in a gold bearing ledge has opened a vein several feet wide with assays running as high as \$500 to the ton. In fact a mad racing in mines has set in.

**ILLINOIS CENTRAL READY FOR BIG EXTENSION NORTH**

Milwaukee, Wis., Oct. 15.—If, as is stated, the Illinois Central railroad is back of the projected Lake Superior & Southern railway, which is to be built from Madison, the Central's most northern terminus in Wisconsin to Huron bay, the Illinois Central will have a direct line from the gulf of Mexico to the lakes.

**CANADA NORTHWEST HAS BUMPER WHEAT CROP**

Victoria, B. C., Oct. 15.—After careful inquiry Premier R. P. Roblin of Manitoba, has estimated that the Canadian northwest has raised a wheat crop this year of 120,000,000 bushels, making the quantity slightly above the average.

**C. B. & I. SET ASIDE SINKING FUND BONDS**

Quincy, Ill., Oct. 15.—The Chicago Burlington and Quincy railroad company having set aside \$233,453 received sealed proposals today for the purchase of sinking fund bonds of the Iowa division. The lenders were called at the lowest price, not to exceed par and with accrued interest for 4 per cent bonds or 105 and accrued interest for 5 per cent bonds.

**REDUCTION OF TARIFF BY SOUTHERN PACIFIC**

Los Angeles, Cal., Oct. 15.—The 25 per cent reduction in its tariff on commodities shipped under refrigeration which the Southern Pacific commenced on Wednesday last will have the effect of much larger shipments of fruit from California and cheaper prices in the eastern states. Larger shipments of other perishable commodities will also be encouraged by the Southern Pacific.

**Some Havana Streets.**

O'Reilly street, one of the big thoroughfares of Havana, gets its name from Gen. Alex. O'Reilly, who named the streets in 1763, and this street after himself. As the name indicates, he was of Irish descent. His forefathers emigrated to Spain from Ireland after the battle of the Boyne in 1690. Many of the O'Reillys have lived in Cuba and the family had an abbatist monopoly in Havana, which was terminated when the Americans took possession in 1899.

Other Irish-Spaniards whose names are identified with Cuba's history are the O'Learys and O'Donnells.

E. H. Bickford and J. B. Nelson of Lake Valley, are among the Shriners. Mr. Bickford is the manager of the Lake Valley Mining company and Mr. Nelson is his assistant. The latter gentleman was initiated into the Mystic Shrine this afternoon.

**Wounds, Bruises and Burns.**

By applying an antiseptic dressing to wounds, bruises, burns and like injuries before inflammation sets in, they may be healed without maturation and in about one-third the time required by the old treatment. This is the greatest discovery and triumph of modern surgery. Chamberlain's Pain Balm acts on this same principle. It is an antiseptic and when applied to such injuries, causes them to heal very quickly. It also allays the pain and soreness and prevents any danger of blood poisoning. Keep a bottle of Pain Balm in your home and it will save you time and money, not to mention the inconvenience and suffering such injuries entail. For sale by all druggists.

**An Awful Cough Cure.**

"Two years ago our little girl had a touch of pneumonia, which left her with an awful cough. She had spells of coughing, just like one with the whooping cough and some thought she would not get well at all. We got a bottle of Chamberlain's Cough Remedy, which acted like a charm. She stopped coughing and got stout and fat," writes Mrs. Ora Husard, Brinkley, Ill. This remedy is for sale by all druggists.
